#### What's New In?

- Free YouTube Analytics
- Retrieve valuable data from YouTube
- View the activities of your YouTube account

Key Features:

- Monitors your YouTube account for you
- Extracts data that can be analyzed to come up with more engaging videos
- Support OAuth authentication
- Adjusts the settings to meet your preferences
- Automatically refreshes when changes occur

What's New in This Release:

- Updates the “Apps for Office” section of the item dialog box
- Minor bug fixes

Clean and intuitive UI, yet slightly challenging setup

Since this is an add-in, it

---

goes without saying that it borrows the looks and feels of the version of Excel you are currently using. However, before you can retrieve data for your team to analyze, first you need to establish a connection to your YouTube account. It is necessary to mention that the app employs the OAuth authentication credentials, an option that might intimidate less-experienced users. Then again, you should know that the utility comes with a comprehensive help guide you could browse and overcome this challenge. Allows you to collect and examine relevant YouTube data The highlight of the app is the abundance of information that you can retrieve from YouTube and that is strictly related to the traffic, views, likes and parameters on your channel. It is necessary to mention that the information is available only as read-only. Even so, you can retrieve useful data, such as activities, captions, channels and

---

sections of the channels accessed, comments, categories of videos or subscriptions, for instance, all of which can help you make a general idea about the interests and preferences of your audiences. A tool that can make a difference in your next marketing campaign

If you would like to learn more about what your customers enjoy watching and the type of videos they share with their friends on social networks, then Excel Add-In for YouTube can help you gain more insight over this matter.
