TrustPort Internet Security is an efficient and comprehensive protection solution, designed to help you keep your computer safe and prepared against any and all virus attacks. TrustPort Internet Security provides you with various protection functions, such as the 'OnAccess Scanner', 'Application Inspector', 'Parental Lock', 'Web' or 'Email Scanner', that can be turn on / off individually, from the application's main window. The program allows you to perform various types of scans, for particular situations. As such, you can perform a 'Quick Scan' that will analyze the most important areas of your system and try to detect any infected files. With the 'Scan Removable Disks' feature, you can analyze the contents of USB flash drives to make sure that they do not pose a threat. Other scanning tools include the 'Scan All Disks', 'Scan Local Disks', Scan Registry' and 'Scan Selected Target' functions. The 'Email Scanner' enables you to activate email protection and antispam scanning. TrustPort Internet Security also helps you configure the 'Firewall' to suit your requirements, by allowing connections from trusted programs only under certain conditions. Nonetheless, you have the option of choosing what happens to each application manually. An interesting feature of TrustPort Internet Security is the 'Parental Lock' tool, which can be set to prevent access to a list of websites. In addition, you can select various groups that can be blocked by this function, such as 'Dating', 'Shopping', 'Chat', 'Hacking' or 'Warez' websites. TrustPort Internet Security also offers you the possibility of exporting a portable version of the anti-virus to your USB device. This way, all files and folders stored on it will be protected, but you can even scan any computer the Flash drive to. TrustPort Internet Security is a great anti-virus solution, protecting you against numerous threats and attacks, successfully guarding your privacy and all the data stored on your computer. TrustPort Internet Security 8.3 P.S. Save as I am not speaking as an expert in any areas, but I am able to explain how it works in simple terms for those who may be new to the world of anti-viruses. This really isn't an anti virus program as such. It's more like a whole suite of programs. Firstly it installs a firewall, it has a antispam scanner, it will diagnose your program files and make sure they are
