===== Andromeda Sky
View for Smartphone This Soft is
manufactured by Andromeda - a
leading company that creates
software to help you enjoy the
universe. Andromeda Sky View is
a planetarium software that
will help you to locate and enjoy
the stars. Features The

Andromedasky-view-software includes the star clock, a scrolling map and a search for stars on the map. Userfriendly interface Andromeda Sky View has an easy-to-use interface that is very intuitive. What you need to do is to click on a star and you will zoom in to the naked eye range of that star. Storing database of information All information is stored in an internal database that can be downloaded and viewed any later time. Search The software also includes a tool to easily locate any point on the map. Windows This software is

compatible with Windows Mobile devices. How to install the soft
Download the.dll from here: If you have any issues about installing the software, give us a call at support@freewarepromotions.com We assure you that this software can be enjoyed! The page is divided into four sections: Home Features System Requirements Download DLL diskette The application is fully customizable. You can enter any labels you like, and also add your own constellations and stars. You can enter the lat / long, declination and magnitude into the database. User friendly

interface and a simple, intuitive interface makes it easy to use. A window that enables you to search b7e8fdf5c8

The Andromeda Sky View can be installed on any PC and offered with the possibility to work on any Windows Mobile device, including PDA or Smartphone. Thanks to the powerful search and retrieval engine, you will be able to find objects, even in the most remote parts of the Universe in no time. Andromeda Sky View will tell you about the histories of the objects you discover in more details than any other application. The most common images of deep sky

objects will appear with the ability to zoom into them. The personal favorites of each user will be kept in a user-specific view for instant retrieval. You can check out where you are: The interactive Milky Way view (besides the ability to adjust brightness and perspective) includes also the information on the time, the position of the Sun and the Moon as well as the degree of the Moon. Besides, new star objects are automatically displayed as they come into view. Your personal adventure in the Universe: Whether you are an astronomer

or just a guy trying to find the Southern Cross, Andromeda Sky View will transport you to another world. The software is entirely built in Windows and is fully customizable. It is very easy to add, modify or delete your new objects as well as the ones you already have. The program is kept updated to ensure the most current information. All of this will bring you a unique experience in the Universe and will test your knowledge as well. The database is continuously updated. The version 1.1 is available for download now. The features are tested on the

Pocket PC (Windows Mobile 2003). Some things may change before the version 1.2. Read more details in the article: Or: Highlighting Some of the Newly Added Features to Viking From: Amazing, truly amazing. As a gearhead, I love all the in-depth details with respect to driver development. As a gamer, when someone says "I also use a horse power scoped sniper rifle as a gaming platform, just like yours. Personally, I think both are equally effective because you can kill with either. It isn't that big of a deal."

What's New in the Andromeda Sky View For Smartphone?

Andromeda is the most complete smart-phone sky atlas of the world. Can you help "Andromeda" in his adventures in the sky? The software will take you to any place on the sky map. The more you use "Andromeda Sky View" the more you will be able to add to his collection. -
