The idea behind Thumper is to create a pulse-pounding rhythm game that rewards both speed and accuracy, with an emphasis on precision. Drag the turntable to the beat and keep time with the music, setting a new high score with every new game. Play a set length of time to see how high your score will go. Perfect timing and a solid lock of the beat is required, as failure to keep time will put you back a turn. Repeat. Progression is fun. Video game greatness has been achieved. Thumper was made by Ascent Game Studios, a passionate team based out of beautiful Norfolk in the UK, where we make games you love. Thumper: We'll be playing and celebrating Thumper for decades.
