It has diversified our lives and made our lives easier at the same time. The article lists some of the most prominent technological revolutions ever witnessed in human history. More>> It was reported[1] that underground bots effectively stole the 2016 US presidential election. The creator of a self-destruct button has clarified[2] that there was no hacking done from his end. More>> Source code of a powerful Linux kernel vulnerability. Microsoft has released patches that fix four of five critical vulnerabilities in the Windows kernel in version 2.6. Read this article in English on the MSRC website. More>> The , as released to public, is a multimedia player that supports various media file formats. The was originally a fork of the fork of the Media Player Classic Home Cinema. More>>Q: Extract year, month, week, day from a date and display specific weekday I have successfully created a macro to extract the year, month, week, day, hour, min and sec from dates. That code is as follows: Dim Starttime As Double Dim Endtime As Double Starttime = "12/30/2012" Endtime = "1/3/2013" If Myrange.Cells(3, 7) > Starttime And Myrange.Cells(3, 7) < Endtime Then Myrange.Cells(3, 7) = Format(Myrange.Cells(3, 7), "mm/dd/yyyy") Else Myrange.Cells(3, 7) = Format(Myrange.Cells(3, 7), "mm/dd/yyyy") End If End If What I'd like to do now, is only display specific weekdays as the date changes. I have tried the following code: If Weekday(Myrange.Cells(3, 7)) = 2 Then And have also tried Myrange.Cells(3, 7).Select Selection.NumberFormat 1cdb3666d

The reference to the restrictions is: The following restriction is applicable when the restrictions query is executed: ... [PARAMETERS] x {Expr|LPAREN} Boolean [expr|OR] {Expr} y {Expr} z {Expr} ... [PERIOD] Why can the restrictions be combined like this? Is the possibility to override cases condition(s) outlined in the restriction's documentation? If so, how do I override cases condition(s)? What conditions are specified for each component? A: This is a confusing and very old construct. It is a wildcard used in the documentation to show that it can be used for any number of restrictions (or even no restrictions at all). And the code generator didn't really understand it until Oracle 12.1. So all you need to do is to replace it with the equivalent, explicit OR: WHERE CASE
