Genealogy & Family History Genealogy Ancestral research projects are often undertaken to find out more about a past generation, a family or a clan. Where do we start? The process of genealogy is to discover where the original person came from. This is often done by taking an interest in your surname. Birth and Marriage entries give clues about where a person came from. If a person's surname is not in the 1881 or 1901 Census then a family tree or family records could be useful. Ancestor Study Family Origins If your surname is not in the 1881 or 1901 Census, a family tree is a great way to begin your research. Traditions may tell of where your family came from, or at the very least a possible line of descent. Source Records Information about family members can come from many sources. Some people find their information on church records, some on birth and death certificates, some on military records, some on census records and some on ancestry.net. Additional records Family history can be a very rewarding undertaking. You may find information about them in newspapers, online social media or email listservs, or genealogical libraries. Research Tools Depending on what type of information you are looking for and how far back in the lineage, there are many different research tools available.
